

MOHAMMED RISWAN M

MEAN STACK DEVELOPER

Profile

Experienced Angular Developer well-versed in Angular 15/16, TypeScript, JavaScript, Tailwind CSS, SCSS, Node.js, Figma for UI/UX, and API integration. Proficient in utilizing Firebase for hosting and Git/GitHub for version control. Demonstrates expertise in RxJS and Angular CLI, with a focus on optimizing project development. Possesses strong problem-solving skills, collaboration capabilities, and adaptability in fast-paced environments. Committed to continuous learning and innovation within Angular development.

Work Experience

MEAN STACK DEVELOPER

LEVELX PVT LTD

JUN 2023- Present

- Experience in utilising front-end frameworks such as Angular and Tailwind CSS, with a specialisation in creating intuitive user interfaces and enhancing overall user experience.
- Proficient in back-end technologies like Node.js and database management, actively contributing to the advancement of server-side functionality and ensuring seamless data handling for web applications.

PROJECTS

RENTINA - RENTING & REAL ESTATE

In progress: Developing an online platform for student accommodation and real estate, facilitating property uploads and secure transactions

MINI - PROJECT

Crafted a comprehensive mini-project encompassing functionalities such as product addition, deletion, and editing, alongside user authentication features including sign-up, sign-in, and profile management. Implemented seamless user experiences through profile editing and product listings, demonstrating proficiency in full-stack development and user-centric design principles.
